CUSTOM SOLAR SIGNAGE

Endless possibilities

ID Signsystems develops custom solar sign solutions specifically targeted to your needs in a manner that can enhance and provide considerable cost saving ROI over traditional on-the grid solutions.

Our design team provides fully engineered concepts that maximize the value of the solar energy provided and deliver illumination 365 days of the year, in the most northern environments. The designs we provide will aesthetically integrate the solar power management process within an attractive architectural sign solution. Our systems are fully guaranteed with our 5 year solar guarantee and the engineering we provide will ensure 6 to 8 days of performance even with only one day's solar charge.

Please contact us if you are exploring a complete new green program solution to your signage needs or wish to retrofit and existing system.
