## HOFF DISPLAY

Break free from the wall

HOFF DISPLAY is an elegant freestanding display that is inexpensive to install, easy to update and flexible enough to work in nearly any environment. HOFF DISPLAY is built around a rugged satin anodized aluminum base which supports a single or double insert topped by an aluminum cap. Inserts are available in tempered glass or a variety of custom materials. In addition accessories can be mounted to the panels including poster holders, shelves, and leaflet dispensers. The system can be updated without special tools.

### MATERIALS

Frame components: aluminum extrusion, clear satin anodized finish  
Panels: 2 pc. 3/16" thick or 1 pc. 3/8" thick tempered glass;  
alternate rigid substrates available in varied thicknesses

### GRAPHICS

Printed media: posters / digitally printed graphics  
Custom graphic treatments: etched glass, silk screening, applied vinyl

### BUILD

Glass: held in place by pressure applied at base and top, secured by single set screw at each end  
Graphics: held in place between glass panels

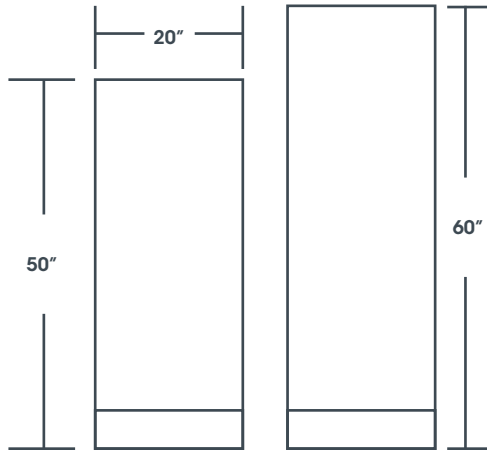

### CUSTOM

Painted frame components: to match any specified color  
Decorative base end covers Leaflet, brochure, product holder  
Fixed floor mount
