# MODULAR TEXTILE LED LIGHTBOX SYSTEM
## Illuminated Textile Lightbox Solutions

This simple and adaptable lightbox system uses dye-sublimated graphics on a fabric that stretches over the frame with 100% of the textile material remaining visible.

The grooved frame perfectly fits the textile print, which has a rubber lip that stretches in place. This makes for fast replacement without tools, even by non-specialists.
Available as:
• Free-Standing
• Wall-Mounted
• Suspended

**SIMPLE ASSEMBLY WITHOUT SPECIAL TOOLS**
**PRESS RUBBER LIP OF TEXTILE PRINT INTO GUIDE GROOVE**

**ASSEMBLED FRAME**

**IDEAL FOR FAST REPLACEMENT OF DESIGNS**

## MODULAR TEXTILE LED LIGHTBOX SYSTEM
Illuminated Textile Lightbox Solutions

### FEATURES

- Custom sizes available

- Visually frameless effect

- Adaptable for ceiling panels, column cladding or suspended effect

- Fabric faces can be easily changed in minutes due to the ingenious edge-mounting system

- Flexibility allows for marketing campaigns to be introduced easily, with minimum overhead

- The 12v LED illumination gives cost-effective bright illumination at low cost.

- 50,000 hours of LED life means little or no annual service costs

- Requires no technical skills or tools to update

- Available single sided in wall-mounted, suspended and free-standing

- Available double-sided in suspended

- Customizable frame colors. White is standard. Can also be made with continuation of a print on sides

- Durable powder-coated frames resist damage

- Modular system means that units can be joined to make larger sizes; ships in modular sizes

- Print management available from IDS. We ensure distribution of materials to the right place at the right time

- Dye-sublimated graphics give rich, attractive image quality with incredible detail

- Interior and protected exterior options available
